## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE \_\_\_\_ MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final. \*
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

- 4) ☐ Claim(s) \_\_\_\_ is/are pending in the application.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claim 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S.

Patent No. 5,414,762 to Flisik et. al. in view of Choe.

As to claim 3, Flisik teaches an Adapter (Controller 20 and Shared Memory 52), an Execution Unit (Pabx Interface 40), an Execution Environment Description Unit (Communication Layer 30), a Programming Language (Functional Command), a Task (performing a telephony control event, col. 5, ln. 38-39), a Pseudo Internal Signal Generator (Controller 20), a Queue Manager (Shared Memory 52), and Internal Queue (60, 62). Flask is silent as to the language used in the Execution Unit, thus Flisik does not teach the Specification Description Language (SDL).

Choe teaches PBXs use the Specification Description Language (SDL) (col. 14, ln. 23 - 25), it would therefore be obvious to one having ordinary skill in the art that the PBX of Flisik would have included a Specification Description Language (SDL) since this is common as taught by Choe.

As to claim 2, Flisik teaches the External Environment Description Unit (30) with the Execution Unit (40); see col. 5, ln. 3 - 4. Flisik teaches function

parameters (command parameters, col. 5, ln. 16), converting (56). Flisik does not use a queue manager in the communication direction from the External Environment Description Unit (30) to the Execution Unit (40).

Choe teaches (col. 8, ln.46 - 47), the use of queues (FIFO) for receiving/transmitting commands to and from an Execution Unit (PBX). It would therefore be obvious to one having ordinary skill in the art to use the teachings of Choe in the device to Flisik, because it would be necessary to queue messages into the device to Flisik so that data would not be lost or have to be retransmitted.

As to claim 1, the rejection of claim 3 meets claim 1 since claim 1 is a method claim of claim 3.

### ***Conclusion***

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The patent cited below is to further show the state of the art with respect to Interposing a Signal Generator between Execution Unit and External Environment Description Unit in general:

U.S. Pat. No. 5,488,569 to Kaplan et. al.

The patent cited below is to further show the state of the art with respect to PBXs that teaches a queue system in general:

U.S. Pat. No. 4,551,832 to Carll et. al.
